

Summary

Interactive Media & Immersive Technology graduate with hands-on industry experience designing and improving multi-platform digital products. Strong in user-centred design, UX research, UI execution, and agile product development, with proven ability to translate user data, support tickets, and business requirements into scalable design solutions. Seeking entry-level Product Designer, UI/UX Designer, UX Designer, or Product Engineer roles in digital and technology sector.

Education Background

Bachelor in Interactive Media and Immersive Technology (Honours) 2022 - 2025

Asia Pacific University of Technology & Innovation (APU) | Kuala Lumpur

- **CGPA** : 3.86/4.00 (Vice Chancellor's List of Year 2023/2024 & Year 2024/2025)
- **Certification** : Foundations of User Experience (UX) Design

Foundation in Computing & Technology 2021 - 2022

Asia Pacific University of Technology & Innovation (APU) | Kuala Lumpur

Sijil Pelajaran Malaysia (SPM) 2016 - 2020

SMJK Hwa Lian | Mentakab, Pahang

Work Experience

Product Design Intern Jun 2024 - Nov 2024

StoreHub Sdn. Bhd. | Petaling Jaya, Selangor

- Contributed to the **design and enhancement of user interfaces and user experiences** across StoreHub platforms, including BackOffice, POS systems, and Beep Delivery, supporting distinct user groups and usage contexts.
- Conducted **user behaviour analysis** using product metrics and qualitative insights, identifying workflow friction points and translating findings into UX improvements to enhance usability and efficiency.
- Analysed **high-frequency merchant support tickets** to identify recurring usability issues, prioritising high-impact problems and proposing design solutions to reduce operational friction.
- **Collaborated closely with Product Managers and Engineers** to align design priorities with business goals, sprint timelines, and technical feasibility.
- Participated in **design kick-off, review, and approval processes** (internal critiques, PMO, and leadership reviews), iterating on feedback to improve usability, accessibility, and visual consistency.
- Supported **grooming and design handoff sessions** by clarifying requirements, outlining edge cases, and preparing UI assets and developer-ready specifications.
- Executed **end-to-end design workflows** from wireframes and mid-fidelity concepts to high-fidelity UI designs and documented handoff deliverables in Figma.
- Assisted in **maintaining and scaling design systems and reusable component libraries** across platforms to ensure consistency, reusability, and long-term scalability.

Project Experience

UR-MU Application (Academic)

2025

Software/Technologies Used: Figma

- Redesigned the Urban Museum (UR-MU) website into a mobile application to **improve visitor engagement and information clarity** through a user-centred UX and UI approach.
- Led an **end-to-end UX process** including user research, on-site observation, card sorting, and parallel design to inform information architecture and UI flows.
- Developed a high-fidelity interactive prototype and conducted usability testing, **achieving a 20% improvement in task efficiency** and an **80% reduction in user errors**.

Consolidating Scattered Design Assets Into a Unified Library (Industry)

2024

Software/Technologies Used: Figma

- Consolidated fragmented and outdated design files into **organised, reusable component libraries** across multiple platforms to restore consistency and scalability.
- **Rebuilt design foundations** by introducing structured asset categorisation and clear usage documentation, supporting efficient and consistent UI execution.
- **Achieved 70% standardisation of core components** and **50% faster design delivery** through reusable, well-documented UI elements.

Improving Welcome Reward Discovery for Higher Redemption Rates (Industry)

2024

Software/Technologies Used: Figma

- **Identified low Welcome Reward redemption rates** caused by poor visibility during checkout and defined UX opportunities within the existing flow.
- Designed a **lightweight animated UI indicator** to surface available rewards without disrupting core checkout mechanics.
- Delivered measurable impact with a **450% increase in reward redemptions** and a **120% increase in reward discovery rate**, demonstrating the effectiveness of targeted UX improvements.

Technical Expertise

- **Design & Prototyping** : Figma, Framer, Adobe XD, Illustrator, Photoshop
- **Collaboration & Project Management** : Jira, Miro, Notion

Language Proficiency

- **English** : Full Professional Proficiency
- **Malay** : Professional Working Proficiency
- **Mandarin** : Native or Bilingual Proficiency
- **Cantonese** : Full Professional Proficiency

Key Competencies

- Cross-Functional Collaboration
- UI Design & Visual Consistency
- Design Documentation & Handoff
- UX Research & Usability Testing
- Accessibility & Usability Awareness
- Information Architecture & User Flows
- Agile & Product Development Practices
- Design Systems & Component Libraries
- Data-Informed Design & Problem Solving
- Wireframing, Prototyping & Interaction Design
- Design Communication with Stakeholders
- User-Centred Design (UCD) & Design Thinking
